A skilled (and handy!) person who chooses to be an owner-builder could literally build their own home nail-by-nail, pipe-by-pipe, wire-by-wire and shingle-by-shingle. But this usually is an extreme scenario. Often, when considering being their own builder, the owner is taking on this extra responsibility largely in an effort to save money.

Waterfall vs Agile You build it, you run it is a rejection of the common waterfall software development practice of having the development team hand off a product to support teams at the end of a project. Such models view developers and support engineers as two completely different specializations. Generally speaking, you build it, you run it is associated with agile software development ...

It's been about a year and half since I did the spring one room challenge and revitalized our main floor bathroom...and yet, I still get asked about the floating vanity we built. Which is great!! I love that people still connect with it and want to know how we designed it. And so, I had every intention of writing a post about all the details...it just took me a little while to get to!
