2.5 1. What is the minimum number of values you would need to change the median? One! The score that is the median or closest to it. For example, if the scores were 1, 3, 5, the median would be 3.0. If we change the 3 to a 4, then the median would be 4.0. Changing either the 1 or the 5 would not change the median (e.g., 2, 3, 100). 2.

2.2.3 Variation. We often want to know how variable the numbers are. We are going to look at descriptive statistics to describe this such as the range, variance, the standard deviation, and a few others.. First, let's remind ourselves what variation looks like (it's when the numbers are different).
