If you like gardening or spending time in nature, you might enjoy making and using dyes from plants. Dyes from flowers, fruits, and leaves of garden plants and wildflowers create unique, mellow colors very unlike the dense colors from commercial dyes. And with natural plant dyes you don't need to use dangerous chemicals.

Bruce McMillan takes his camera into the garden and orchard to discover color as it grows in nature: Red raspberries, orange carrots, yellow squash, green peas and more.

Growing Colors by Bruce McMillan - Goodreads

Putting on a fresh coat of paint and waiting for the still-wet, glossy walls to dry is akin to coaxing a seedling to grow into a full-fledged plant. You've done the prep, the hard work, and now eagerly hope to be rewarded with a room or a garden that will bring you joy for many seasons to come. One thing is a given: Color is a subjective subject.
