Rock climbing and bouldering require power for explosive movements, balance to traverse or move up a rock face, endurance to sustain you through long climbs, and a stable core to help you climb better and more efficiently. The best way to train for rock climbing is to spend time climbing—whether you do at the gym or the crag.

While these self-evaluations are a part of all of Horst's books (including Training or Climbing, and How to Climb 5.12), the evaluations in this book are much more elaborate than those in any of the others. In spite of a lot of overlap with Training for Climbing and How to Climb 5.12, every climber should still have this book in his or her library.
