Constructing Grounded Theory: A practical guide through ...

Grounded theory (GT) is a systematic methodology in the social sciences involving the construction of theories through methodical gathering and analysis of data. This research methodology uses inductive reasoning, in contrast to the hypothetico-deductive model of the scientific method. A study using grounded theory is likely to begin with a question, or even just with the collection of ...

Grounded theory - Wikipedia

Stated simply, grounded theory methods consist of systematic, yet flexible guidelines for collecting and analyzing qualitative data to construct theories 'grounded' in the data themselves. The guidelines offer a set of general principles and heuristic devices rather than formulaic rules (see also Atkinson, Coffey, & Delamont, 2003).
