Both surface water and groundwater eventually return to the ocean, where evaporation replenishes the supply of atmospheric water vapour. Winds carry the moist air over land, precipitation occurs, and the hydrologic cycle continues. In the hydrologic cycle, water is transferred between the land surface, the ocean, and the atmosphere.

Edwards Air Force Base occupies the northern part of Antelope Valley, California. As a result of large-scale and increasing agricultural pumping in the valley, the net draft has exceeded the perennial supply since about 1930 and was about 170,000 acre-feet in 1951—at least three times the estimated yield. As a result, there has been a continuing depletion of ground water stored in all the ...
