mathematics curriculum. The second trend we have identified is that of a new unification of mathematics. This is discussed at some length in [3], so we will not go into great detail here. We would only wish to add to the discussion in [3] the remark that this new unification is clearly discernible within mathematical research itself.

New Trends. Cultural shifts have occurred since the 1980s that call for the reexamination of gender differences in mathematics. In the 1980s, a prominent explanation of male superiority in complex problem solving beginning in high school was gender differences in course choice (Meece, Eccles-Parsons, et al, 1982). Girls were less likely than boys to take advanced mathematics courses and ...
