Risk Management What is risk • Risk is the downside potential of the actual results being adverse compared to the expected results • Certainty where it is known what will happen and the happening or non happening carries a 100% probability • Uncertainty is where even the probable outcomes are unknown.

Risk Management - DocShare.tips

At Cargill, we know where there is risk, there is also an opportunity to be proactive instead of reactive. To think differently about protecting margins or securing more predictable pricing. To be empowered to deploy smarter strategies, control positions and manage price risk with greater confidence.
