Using COPY and COPY LOCAL. The COPY statement bulk loads data into a Vertica database. You can initiate loading one or more files or pipes on a cluster host. You can also load directly from a client system, using the COPY statement with its FROM LOCAL option. COPY lets you load parsed or computed data. Parsed data is from a table or schema using one or more columns, and computed data is calculated with a column expression on one or more column values.

Bulk Copy. ODP.NET provides a Bulk Copy feature which enables applications to efficiently load large amounts of data from a table in one database to another table in the same or a different database. The ODP.NET Bulk Copy feature uses a direct path load approach, which is similar to, but not the same as Oracle SQL\*Loader.

## **Bulk Copy - Oracle Cloud**

Load definition is - the quantity that can be carried at one time by a specified means; especially : a measured quantity of a commodity fixed for each type of carrier —often used in combination. How to use load in a sentence.

## **Load | Definition of Load by Merriam-Webster**

(1) To install. For example, to load a disk means to mount it in a disk drive. (2) To copy a program from a storage device into memory. Every program must be loaded into memory before it can be executed. Usually the loading process is performed invisibly by a part of the operating system called the loader.
